

Nature Color Matching

Cut out each of the colors at the bottom of the page. Take each color and place it into each compartment of an egg carton. Feel free to decorate the outside of your carton any way you choose. Head outside with your colorful carton and find natural objects to place in each compartment.

Take each color disk and place it in a compartment.

After you have found your matches, talk about what you found.

- Was one color harder to find than another color?
- Did you find colors in unexpected places?
- Would finding these colors be different if done at another time of year?
